Session Title: **Getting Started with Mylio Photos**
Presenter: **Angela Andrieux, Product Evangelist**

**Class Description:**

Get up and running with Mylio Photos – the app that turns your computers, phones, tablets, and storage devices into a smart central hub for managing a lifetime of memories.

You will learn how to:
• Add photos to your Mylio Photos Library from external hard drives, phones, and more.
• Access all your photos from all your devices (Windows, Android, macOS, iOS & more).
• Navigate Mylio Photos so you can find your photos when you want them.
• Get additional education resources.

**What to Expect:**

An overview of Mylio Photos to see how the app and service can help you gather, organize, and protect your media library.

**Skill Level:**

This class is perfect for all experience levels. It's for anyone who values their family photos, videos, and documents, and who wants to organize, share, and protect their collection for today — and for generations to come.

**Objectives:**

• Gather photos, videos, and documents from multiple sources (computer, external hard drives, smartphones, social media, scanned media) into a universal media library.
• View and manage your media library from any device (computer, tablet, smartphone) without the cloud, and even offline.
• Easily find photos with the LifeCalendar, geotags, AI Face Recognition, and more.

**Key Resources:**

Mylio Photos user interface overview
Add and import media to your Mylio Photos Library
Organizing with metadata
View your life in photos with the LifeCalendar
Using face recognition to tag and browse photos
Managing your photos
