

Session Title: **Enhancing and Repairing Your Digital Images**
Presenter: **Angela Andrieux**, Product Evangelist

Class Description:

The #1 reason to edit a photo is to make it look its best. Whether you're capturing images of your kids, recording moments of a spectacular vacation, or restoring old family photos, editing can help make your images look amazing.

Mylio Photos contains essential editing tools that work equally well on your computer and mobile devices. These tools can help you improve exposure and contrast, adjust color, and even auto-enhance scanned photos and invert negatives.

In this class you'll learn how to use Mylio Photos to:

- Fix composition problems.
- Control Color and Remove Color Casts.
- Adjust Tone with exposure, contrast, and more.
- Create a black-and-white photo.
- Invert scanned film negatives.

What to Expect:

An overview of the Mylio Photos editing tools, and how to use them to enhance and repair your digital images.

Skill Level:

This class is perfect for all experience levels. It's for anyone who values their family photos, videos, and documents, and who wants to organize, share, and protect their collection for today, and for generations to come.

Objectives:

- Familiarization with the editing tools available in Mylio Photos.
- How to crop and straighten images for improved composition.
- Improving the brightness and contrast.
- Repairing images that may have faded with time or become discolored.
- Converting a color photo to black and white.
- Inverting and color correcting scanned film negatives.

Key Resources:

- [Fixing composition problems](#)
- [Enhancing exposure and tone and photographs](#)

- Controlling and correcting color
- Creating a black-and-white photo
- Inverting scanned film images
- Repair and correct faded and discolored photos
